presents

Ecology as the Heart of Theology

Science and religion are not enemies; indeed they must work together if humanity is to survive the 21st century. Given our impact on Earth's climate, the seas and other species, humanity is facing "the Great Reckoning" that can also be "the Great Homecoming," as our prodigal species comes home to reality. This presentation focuses on six points of agreement held in common by tens of millions of religious and non-religious people across the globe. It will inspire and encourage you in the face of changing climate and other environmental challenges.
